

1. SETTING THE SCENE

This material has been developed as part of the Australia School Innovation in Science, Technology and Mathematics Project funded by the Australian Government Department of Education, Science and Training as part of the Boosting Innovation in Science, Technology and Mathematics Teaching (BISTMT) Programme.

Synchrotron Investigations

1.1 Dr Tim St Pierre – setting the scene

The video is split into three chapters:

1. Why he chose science as a career and where it has taken him.
2. Tim's current research on human 'iron overload' disease and how he uses the synchrotron to assist him.
3. The important connection between maths and science.

The video has been broken into segments to allow for teachers to play the chapters independently of each other.
